

evolved as a strong and loyal member of the company. Haider was introduced as an honest employee having organized and methodical in work.

After the introduction and covering up meeting main points, the Director moved towards the problems that had like the previous ones and they now felt quite motivated to work.

Ahmed inwardly felt satisfied at work after a long time and his mood was uplifted to know that his boss considers him to be having leadership skills. This only motivation boosted his performance graph. Same was the case with other project engineers.

Another strategy adopted by the director was to arrange casual get-togethers. This initiative helped the project engineers to become well acquainted and the casual feedback that they provided to each other transformed them in a team and the uncertainty among them reduced. As a result the performance level rose to a fair extent.

1. What impact does feedback of the Director in front of CEO had on the Project Engineers? Use your

understanding from the concept of Johari window and explain. (CLO 01)

2. How did perception of the Director help develop a more dedicated team in the interest of the

Organization? Justify your answer with two reasons in relation to the perception of self and others.

(5 marks) (CLO 02)

Q3. What is communication competence? Write four strategies to grow and develop communication competence in any professional context. (2.5*4 = 10 marks) (CLO 02)

National University of Computer and Emerging Sciences, Lahore Campus

Course: Communication Skills
Program: BS (EE)
Duration: 60 min.
Paper Date: 18 Sep. 2017
Section: 1, 2, 3
Exam: Session - 1

Course Code: 55-123
Semester: Fall 2017
Total Marks: 30
Weight: 15%
Pages: 2

Instruction/Notes: Cutting/overwriting would lose marks.

L14-4435

Q1. National University issued an office order to construct a larger campus in Lahore on account of accommodating increasing number of students. For that, the order was issued to the management to consult construction companies and develop a contract to be signed. The contract was developed by the management with a list of requirements which was then issued to different companies so as to hire the best bid. Since the construction program was a big project so the chairman expected giant enterprises to contact them for signing the project.

After issuance of terms and conditions to various companies the management didn't find any eminent company willing to work on the project. This odd and unexpected response bothered the Head Office and they called a meeting of several construction companies heads to know the reason of refusal. The answer they received was that they were already occupied in other projects and so were unable to book themselves for this one. This answer was not satisfactory. So, the University's Head Office asked one of his Managers to find out the real reason for this unexpected refusal. The Manager formed an immediate committee who then called each and every company personally and casually tried to find out about the real reason behind project refusal. To a great surprise, it was found that the companies had refused because of only one clause in the contract which emphasized the project to be finished in an unrealistic time limit. This happened because the person who delivered the instructions from the Head Office had to take an urgent leave on account of a health issue and so he gave the task of writing a contract letter to another employee.

1. In the above case, define the problem encountered in communication process. (4 marks) (CLO 01)
2. Provide three suggestions to improve the communication process. (6 marks) (CLO 02)

Q2. Green Leaf Engineering Co. takes pride in the team work it does to manufacture best packaged products. The output of the employees in terms of work was inconsistent and that ranged from frontline employees to back end employees. The CEO had a meeting with the Director and his Project Engineers. Agenda of the meeting was to discuss the problems of machinery and man power and to devise solutions for it.

While introducing his project engineers, the Director gave positive feedback to each employee at the commencement of meeting. This practice was new to the project engineers since the previous meetings were more formal and acknowledgments were never touched upon. The Director wanted to change the culture of workplace so that employees should be comfortable and happy to work in the company.

Asad was introduced as a committed team member who has never delayed any task. Hamid was introduced as a member who has helped several new employees in understanding the work voluntarily and with the best interest of company at heart.

Ali was introduced as a creative member of the team who brings in new ideas that are applicable and research based. Qasim was introduced as the senior member of the team who has survived through every problem and

Abid: Well, that's nice. Were you rewarded on this solution?

2
Tahir: Yes I was awarded with a certificate of appreciation by the company which was only awarded to employees that worked really well. I was the first intern to receive it.

Abid: (nodding with admiration) Suppose one of your team members is not happy with your progress. How would you keep this person on the team without letting him/her harm you and get work done?

Tahir: I would ^(rephrase!) monitor all of his/her activities, ~~and~~ I will try to fix and resolve our issues, if all else fails I'll try my level best to not ~~to~~ be hostile towards him to his/her face.

Abid: Okay, would you mind asking for help from the seniors if you need it?

Tahir: Yes I most certainly will! During my life as an undergrad I've always approached my seniors as well as peers for assistance in matters I've required help in.

Abid: Do you prefer working on your own to working with others?

Tahir: I ~~prefer~~ would be comfortable with both these situations since I've worked both ways in the past and enjoyed both experiences. Though, due to conflicting opinions I tend to bump heads with others sometimes.

Abid: That sounds fine. This job requires the ability to take initiatives and be willing to work with others. Let me ask another question. As I was looking over your transcript and résumé, I noticed that there was a gap of one semester. Does that indicate you have difficulty managing time?

Tahir: I work quite well with deadlines and time management. It's one of my areas of expertise. I took a gap of one semester due to a severe car accident as I previously told you.

Abid: So, do you intend to do any specialization or higher education in the next five years? Why?

Tahir: I intend to specialize in power distribution

and transmission in the years to come because I've ~~been~~ always been passionate about grid maintenance and would like to gain more knowledge of grids. Our office will get to you soon.

Abid: Thanks, it's been nice talking to you. Likewise! It was an

Tahir: You're most welcome! Likewise! I'll await absolute pleasure to converse with you! I'll await your response!

Q1. Sketch out the communication model with appropriate labels. (5 marks) (CLO 01)

Q2. How do self-concept and perception contribute to social communication settings? (10 marks) (CLO 02)

Communication Model has following attributes

1. Sender
2. Receiver
3. Channel

Firstly sender sends a encoded message through a channel. And receiver receives the message through that channel and decodes it. After understanding the receiver replies back with an answer or a feedback.

channel is the medium through which communication is taking place.

Q. In the following conversation, provide suitable answers as an interviewee. (15 marks) (CLO-04, 05)

Interview:

Abid (HR): Mr. Tahir, I see you're a bit late. I hope things were okay. Please sit down.
 (Gestures to take a chair)

Tahir:

1 My apologies for being late Mr Abid! I ran into some traffic on my way here! (needs completion)

Abid: (He sits in the chair in front of the desk) I see you have recently graduated. So, how do you intend to take a start in your profession?

Tahir:

0.5 I intend to find a job that's best suited for my needs. It helps me gain experience, earn a satisfactory amount of money and also to learn. As it happens I've already begun my job search.

Abid: (smiles meaningfully) Hmm... Although we have received a good number of applications, but we are interested in the top fifteen candidates. This number includes room for three fresh ones. Therefore, you have a strong chance of getting selected if you stand true to reflect your resume.

Tahir: My resume is in fact a reincarnation of my professional capacities! You will not be disappointed here.

Abid: Let me elaborate you about a rather common problem we've had with our past engineer trainees. Many of them run into a problem—something they have trouble learning or doing right. That's normal enough—we expect that. But a lot of trainees give way under these pressures and give up. Could you relate a situation where you did not give up and came up with a practical solution?

Tahir:

2 I had to be hospitalized after a car accident. I had white fever. I was interning at PFL and by the time I recovered enough to start working, there were only 2 days left before the deadline. I did not panic, stayed calm and utilized all my resources to complete my project without losing my cool.

Q2.

Contribution of Self-concept & Perception in Social Communication:
Perception is the understanding that

In social communication settings, perception and self-concept can lead to the misunderstanding and bad communication.

So, through following measurements, we can improve our communication skills.

Stereotypes is the invention of perception and self-concept.

^{Grouping}
Self-concept sometimes misjudge the situation and leads to improper behaviour. We can improve our communication skills.

by

- asking questions
- fairness in the judgements
- ~~don~~ doing perception checking
